

TRAMA SUPPORT & VWMA SUPPORT STOCKS - 2026 BACKTEST

Quantitative Backtest, Statistical Evaluation & Live Support Scanner | Nifty 500 Universe (Jan 1 - Aug 24, 2026)

1. EXECUTIVE SUMMARY & KEY FINDINGS

Performance of Institutional Pullback & Bounce Strategies across 2026 YTD Market

This quantitative study evaluates the efficacy of buying pullbacks to dynamic support levels in 2026 using two key indicators: 1) Trend Regularity Adaptive Moving Average (TRAMA-99) as the long-term structural baseline, and 2) Volume-Weighted Moving Average (VWMA-20) as the short-term institutional volume anchor. Both systems were tested across all 500 Nifty stocks with strict risk-managed 2-slot portfolio sizing on Rs. 100,000 capital, yielding exceptional alpha over the benchmark.

4. QUANTITATIVE RULES & ENTRY/EXIT MECHANICS

Exact Algorithms for Identifying Valid Support Bounces

- Trend Alignment (Regime Filter):** Only buy stocks where Price > 200 SMA and VWMA(20) > TRAMA(99), ensuring long-term institutional sponsorship.
- VWMA Support Entry:** Daily Low tests within 1.5% of VWMA(20) (Low <= VWMA * 1.015), Close holds above VWMA (Close >= VWMA * 0.995), with a bullish green candle (Close >= Open) and RSI between 38 and 68.
- TRAMA Support Entry:** Daily Low pulls back to the adaptive baseline (Low <= TRAMA * 1.025), Close holds support, and confirms a bullish rejection candle.
- Risk Management:** VWMA model utilizes a 10% Stop Loss with 25% Target Profit and 8% Trailing Stop from peak. TRAMA model uses 7% SL and 25% TP.
